

A Box with *Attitude*

System Flexibility

Our specially designed garmentainers give customers two different options or combinations of these options to hang the ideal number of garments in a safe and cost effective way.

String System

With the String System, the garmentainer is equipped with a row of horizontal bars which are fixed at the top of the container. Both the number of rows of bars and the spacing between them are flexible according to the type or types of garments being shipped. Knotted strings are hung from the bars.

*The new String System allows 50% more acceptable load than before.
Optimum Evenly Spaced Hanging Options:*

Type	Row Options	Row Spacing
20'HG	8	711 mm (28")
	11	521 mm (20.5")
	12	470 mm (18.5")
40'HG	22	546 mm (21.5")
	23	521 mm (20.5")
	24	495 mm (19.5")

Personalised service

OOCL's garment specialists will work with you to find the optimum system or systems, taking the weight, shape and size of the garments into account.

Bar System

In the Rack or Bar System, the garmentainer is loaded with rows of hanging bars at a range of flexible heights and space as per the needs of the garments. The rated loading of our hanging bars is considered very competitive in the market – between 300-500 kg depending on single or double hanging bars.

Three tiers of bars are possible, and even "V" shaped hanging patterns can be catered for. In addition to our specially designed garmentainers, other types of rack can be made available according to your specific requirements.

Optimum Evenly Spaced Hanging Options:

Type	Row Options	Row Spacing
20'HG	8	711 mm (28")
	11	521 mm (20.5")
	12	470 mm (18.5")
40'HG	22	546 mm (21.5")
	23	521 mm (20.5")
	24	495 mm (19.5")

Hanging Height Options:

Tier No.	Hanging Height
Top tier (fixed)	2,362 mm / 93"
Hanging options for tier 2 or 3	1,549 mm +/- 102 mm (61" +/- 4") 1,194 mm +/- 102 mm (47" +/- 4") 762 mm +/- 102 mm (30" +/- 4")

OOCL Garmentainers provide:

Cost savings

- Save up to 20% on total transportation and handling costs

Greater Load Capacities

- Increase of 50% with the String System
- Increase of 20% with the Bar System
- Cubic capacity increase of 4% in the Bar System

Flexibility

- Flexible rows and spacing – horizontally and vertically
- Multiple sizes and density of garments can be shipped

Optimize shipments by combining both systems!

OOCL – carrying the latest fashion around the world

AT OOCL, we know that time and resources are of the essence when it comes to fashion.

Designers and manufacturers in the fashion industry survive by being the first to set the fashion trends, keeping abreast of consumer tastes and supplying the relevant garments. Survival also means being innovative.

Garments are extremely time sensitive, in terms of both being on the shelves at the right time and holding a minimum of stock. To be successful, you need to be an expert in “just-in-time” logistics management.

You need a carrier who understands your production and delivery processes, as well as your market.

Optimum safety

To ensure the safety of your garments, OOCL covers the entire container interior and if desired will provide moisture protection with silica gel.

Discover the trendiest innovations from OOCL

OOCL offers an innovative, flexible container especially for shipping garments – the “garmentainer”.

The garmentainer maximizes loading capacity with flexible hanging systems. They are quick and easy to install, and provide greater cost efficiency.

OOCL provides for your specialized needs with our “Take it personally” attitude.

OOCL's role in the supply chain

Time-sensitive products demand a partner who knows both the garment and shipping business.

Just like the fashion industry, OOCL is a **trend setter** always keeping ahead to anticipate market changes. We are constantly introducing innovative new equipment and technology, such as the garmentainers.

With OOCL, you have greater **variety** – you choose from two different garmentainer systems, or a combination of both. Our customer service department works with you to adapt to a tailor made, overall transportation system.

OOCL knows the garment industry and can assist in just-in-time management of inventories and seasonal garments. We can assure timely delivery of raw textile products, reducing production lead-times. And our subsidiary consolidation company, OOCL Logistics, specialises in multi-country consolidation and third party logistics.

Based in Hong Kong with comprehensive services in Mainland China, OOCL is uniquely qualified to serve this essential market, as well as South East Asia and the Indian Subcontinent.

Together with our fast transit times, flexible closing times and first priority booking, make OOCL your partner of choice.

We take it personally
