Documentation Requirement Update- Vietnam

The Harmonized System (HS) is a standardized system which classifies various products subdivided into chapters, headings and subheadings.

Effective immediately, the 6-digit HS code will be required for cargo discharging at Ho Chi Minh, Cat Lai and Vung Tau, Cai Mep Terminals and moving inland. It will also be required for cargo transshipping through these terminals.

In addition, for all inbound shipments to Vietnam that are scrap or waste commodities now require 8-digit HS code.

Pro-Tip: OOCL's Contact Information

My OOCL Center: MOC Reports- Summary Reports

MOC- My OOCL Center

MOC Reports

Part I: Summary Reports

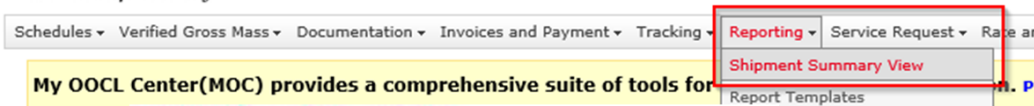

With My OOCL Center Reports you can get quick access to consolidated shipment details and minimize the time spent searching through multiple documents. These reports provide you with a flexible and efficient way to monitor and manage your shipment information. You can view 15 online summary reports to receive a status update for your booking(s), bill of lading(s) and container(s) at a quick glance.

1

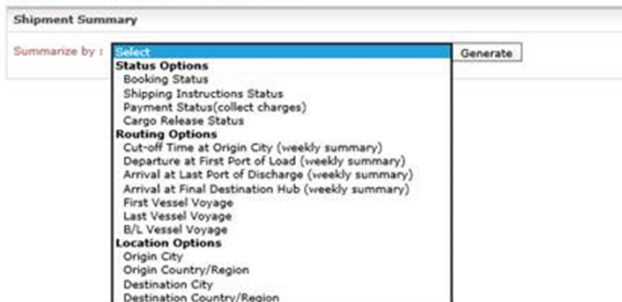

Log into MOC and click on “Reporting” option from the menu then select “Shipment Summary View.” Select one of the 15 summary reports available. After selecting the report of your choice, please click on the “Generate” button.

We take it personally

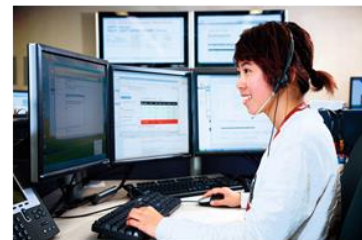

Shipment Summary Generation

2

Once you have selected the desired report, you have the option to email the report results. For example, if you have selected the booking status summary report, you can click on the data details under number of bookings or number of containers and then click on the “Email Report” button.

OOCL Wins Two HKMA Sustainability Award Trophies

PRESS RELEASE

OOCL Wins Two HKMA Hong Kong Sustainability Award Trophies

OOCL proudly received the "Hong Kong Sustainability Award" and "Special Recognition for Outstanding Sustainability Initiative: Environmental Dimension" at the Hong Kong Sustainability Award 2018/19 ceremony on November 11, 2019.

Organized by the Hong Kong Management Association (HKMA), the Hong Kong Sustainability Award aims at recognizing organizations which have demonstrated outstanding sustainability practices in economic, social, and environmental aspects while achieving good business and organizational performance within their industry sectors. The awards program also advocates for cross-sector sharing of best practices while inspiring organizations to entrench sustainability into their operation and culture for more impactful and long-term business sustainability results.

Over the years, OOCL has been proactively taking on a leadership role in implementing many important initiatives to address the environmental and business challenges, such as its relentless efforts in operational efficiency, bunker saving, investing in fuel efficient containerhips and other best practices that contributes significantly to the success of our overall sustainability profile and competitive position in the industry. OOCL is also an industry leader in applying advanced AI technologies to improve its operating efficiency and business practices whereby reducing cost, improve sustainability and providing better services to its worldwide customers.

Receiving the award on behalf of OOCL, Mr. Erxin Yao, Director of Corporate Operations and Marketing and Regions Management said: "We are very honored to receive the two awards from the HKMA that recognizes our excellent achievements and dedication to sustainability. This award is very encouraging for OOCL to continue pushing our corporate sustainability agenda further into the next level and achieve the long-term sustainable development goals ahead of us. OOCL looks forward to working more closely with our business partners and stakeholders to advance our green initiatives for a more sustainable future in our industry."

Mr. Helmuth Hennig, Chairman, The Hong Kong Management Association (Left) hands the awards to Mr. Erxin Yao, Director of Corporate Operations and Marketing and Regions Management of OOCL(Right).
